

A timeless classic

SR Vivodent

Proven denture teeth
made of quality PMMA

Proven and refined

SR Vivodent and SR Orthotyp: our popular and timeless teeth are ready to take on combination dentures in your laboratory.

They are now available in A-D and Bleach shades and therefore capable of fulfilling all the requirements of modern denture prosthetics. For customized dentures – highly esthetic and definitely functional.

The fascination of denture prosthetics – more than a denture

We pay attention to details, but never lose sight of the bigger picture. Our prefabricated denture teeth are an integral component of our functional and coordinated prosthodontic workflow.

Individualized and efficient – for you and your clients.

Amazing creativity

- ✓ Anterior moulds based on those of natural teeth
- ✓ Harmonious integration in the natural dentition
- ✓ Versatile applications

Comprehensive shade range

- ✓ A-D, Bleach and Chromascop shades
- ✓ High flexibility in routine laboratory work
- ✓ Excellent performance in complete, partial and combination dentures

Proven material

- ✓ Cross-linked PMMA
- ✓ Sound chemical bond to denture base materials
- ✓ Versatile applications

Your benefits:

- ✓ Anterior teeth of different shapes and sizes to kickstart your creativity in the dental lab.
- ✓ An abundant selection of shades offers you exceptional flexibility. Strong performance in complete and partial dentures and in combination with fixed dentures.
- ✓ Cross-linked PMMA has been successfully used over decades. High quality is very important to Ivoclar Vivadent. Therefore, materials are subjected to stringent quality testing. This ensures a reliable basis for dentures that will give you and your clients and their patients long-lasting satisfaction.
